

Note:

The names of countries and oceans exceed 250 words, with the activation of the feature ( collapse transformation ) for high accuracy, and this may cause a slow display.

Therefore, I recommend temporarily hiding the text layers (Tow Yellow label color Layers) that I have previously referred to in the project and working with all flexibility while working on the project, After the animation is done you can then unhide all layers.

If you need anything, you can contact me via the email on my main page on Envato, and I will be happy to serve you and assist you.

Thank you and I wish you success.
